

## GAU, Faculty of Engineering

<b>Course Unit Title</b>	Introduction to Computer	
<b>Course Unit Code</b>	ENG101	
<b>Type of Course Unit</b>	Compulsory, All engineering students	
<b>Level of Course Unit</b>	1st Year BSc	
<b>National Credits</b>	3	
<b>Number of ECTS Credits Allocated</b>	5 ECTS	
<b>Theoretical (hour/week)</b>	2	
<b>Practice (hour/week)</b>	-	
<b>Laboratory (hour/week)</b>	1	
<b>Year of Study</b>	1	
<b>Semester when the course unit is delivered</b>	1	
<b>Mode of Delivery</b>	Face to Face, Laboratory Experiments	
<b>Language of Instruction</b>	English	
<b>Prerequisites and co-requisites</b>	-	
<b>Recommended Optional Programme Components</b>	Basic background in basic computer components and software	
<b>Objectives of the Course:</b>		
<ul style="list-style-type: none"> <li>➤ Analyze the basics of computer, hardware, software</li> <li>➤ Learn the basic principles of using Windows Operating System</li> <li>➤ Learn the basics of Internet and World Wide Web</li> <li>➤ Analyze the basic principles of algorithms and flowchart representation</li> <li>➤ Learn Office Tools such as word processing, spreadsheet and powerpoint presentations</li> <li>➤ Develop an intuitive sense of how computers work and how they can be used to make academic work and everyday life more efficient</li> </ul>		
<b>Learning Outcomes</b>		
When this course has been completed the student should be able to		Assesment.
1	Recognise the basic concepts of computer organization, architecture, CPU, computer memory, I/O Devices and fundamentals	1
2	Explain the fundamental computer science concepts such as history of programming languages and computing, operating systems, information management system	1
3	Demonstrate ability to use basic word processor, spreadsheets, powerpoint and database programs	1,2,5
4	Demonstrate the ability to use internet tools	1,5
5	Develop simple computer algorithms	1,2
6	Express the fundamental topics of network	1
Assesment Methods: 1. Written Exam, 2. Assignment 3. Project/Report, 4.Presentation, 5 Lab. Work		
<b>Course's Contribution to Program</b>		
		CL
1	Ability to understand and apply knowledge of mathematics, science, and engineering	3
2	Ability to design and conduct experiments as well as to analyze and interpret data	1
3	Ability to work in multidisciplinary teams while exhibiting professional responsibility and ethical conduct	1
4	Ability to apply systems thinking in problem solving and system design	2
5	Knowledge of contemporary issues while continuing to engage in lifelong learning	
6	Ability to use the techniques, skills and modern engineering tools necessary for engineering practice	3
7	Ability to express their ideas and findings, in written and oral form	2
8	Ability to design and integrate systems, components or processes to meet desired needs within realistic constraints	2
9	Ability to approach engineering problems and effects of their possible solutions within a well structured, ethically responsible and professional manner	2
CL: Contribution Level (1: Very Low, 2: Low, 3: Moderate 4: High, 5:Very High)		

Course Contents			
Week			Exams
1	Chapter 1	What is Computer?, Computer Organization, Introduction to Information system, people, software, hardware, data	
2		Data storage unit, memory types; RAM, ROM, CMOS	
3		Fundamental OS utilities, Input and output devices.	
4		System software, Application software.	
5	Chapter 2	Fundamental number base conversions	
6		Binary shifting and geometric series in number base conversions	
7	Chapter 3	Structured Programming developments, Algorithms	Quiz
8		Designing the pseudocode with flowchart representation	
9			Midterm
10	Chapter 4	Data communication and fundamental hardware types, high speed wireless communication, World Wide Web.	
11	Chapter 5	Understanding the basics of MS Word with exercises	
12		Understanding the basics of MS Powerpoint with exercises	
13		Understanding the basics of MS Excel with exercises	
14			Quiz
15			Final

### Assessment

Attendance	5%	
Laboratory Quiz (Computer Based)	10%	
Midterm Exam (Written)	35%	
Quiz (Written)	10%	
Final Exam (Written)	40%	
Total	100%	

### ECTS Allocated Based on the Student Workload

Activities	Number	Duration (hour)	Total Workload(hour)
Course duration in class (including the Exam week)	14	3	42
Labs and Tutorials	7	1	7
Assignments	-	-	
Project/Presentation/Report Writing	-	-	
E-learning Activities	-	-	
Quizzes	2	7	14
Midterm Examination	1	14	14
Final Examination	1	22	22
Self Study	14	3	52
Total Workload			141
Total Workload/30 (h)			4.70
ECTS Credit of the Course			5
